Materials description

METAL

Metal covers are a 3 mm thick aluminium plate that is enriched with gold or silver tones in a satin or polished finish. Edges are carefully rounded with precision milling. Images and text are permanently transferred through sublimation onto the metal surface. The base colour of the metal emerges in the lighter parts of the image while the darker portions coat it.

METAL PAINT

The 3 mm thick, solid aluminium plate is varnished using a process derived from the car industry. High quality standards ensure a perfectly smooth surface available in 20 colours and 4 finishes: varnished, metalized, pastel and touch. You can customise the covers with laser engraving, which reveals the aluminium underneath, or you can use colour overprinting. This allows you to do anything from a simple text to an elaborate design.

WOOD

Handcrafted natural oak wood compliments your book with its strength and solidity. Available in plain (LRO1, LRO3 and LRO4) or brushed finishing (LRO2/S).

CORK

100% natural, impermeable and non-deformable, Cork features extreme lightness and softness that ensure excellent ductility. It is offered in its natural colour with a matte finish that enhances its texture and heightens the distinctive warm and artisanal elements of this material.

LEATHER

Italian half grain bovine leather featuring a durable matte finish offered in a large selection of colour tones that age beautifully. This material is the perfect choice for all those applications that require versatility and natural quality.

DISTRESSED

Full grain Italian bovine leather, treated with aniline, to ensure resistance to wear and enhance the character and craftsmanship of the distressed finish.

SEQUOIA

Extremely high quality, and beautiful, aniline treated Italian nubuck cow leather that has a distinct vintage effect obtained through a special hand-finishing process. Its softness and warm tones is the highest expression of classic vintage elegance.

NAPPA

Extremely soft, full grain leather, developed for the fashion industry. Beautifully soft to the touch yet very durable.

COWHIDE

Real Italian Cowhide epitomizes a subdued, elegant style thanks to its timeless craftsmanship. The stitching around the perimeter further enhances the look. It is available in three colours.

LEATHERETTE

The new generation of Leatherette chosen by Graphistudio is light and versatile featuring a smooth surface that is very easy to clean. It is a fabric coated with a polymeric material that perfectly adheres to the base and gives you the ideal combination of quality and value.

CLASS LEATHERETTE

Our Leatherette is further enriched with a velvety satin finishing. It offers high resistance to wear and tear together with a lightness that ensures it perfectly adheres to the base it is applied on.

CLOUD LEATHERETTE

Available in an extraordinary range of colours enriched with a shaded effect, the Cloud Leatherette has an extremely smooth surface and very soft touch. The innovative fabric, coated in a polymeric material, offers high resistance to wear and tear.

ECO LEATHER

Fabric made from high resistance, innovative, eco-friendly materials ensures deep lasting colours. Advanced coating techniques offer exceptional firmness and a lycra-like satin surface appreciated by architects and designers.

ECO LEATHER DELUXE

High quality, resistant fabric made in Italy in a vegan leather

that features substantial content of natural fibres. The soft surface perfectly reproduces a leather texture and offers certified colour stability to rubbing and light.

WOOD FIBRE

This extremely mouldable material, obtained from a mixture of cellulose and wood pulp, perfectly combines the natural look with durability and the lightweight offered by synthetic materials.

MAPLE

The Maple is a 100% viscose material that enhances the intensity of the vivid colours. The life-like wood grain reproduced on the surface is easy to clean and resistant to wear.

FLUO

Fluorescent-coloured polyurethane material, 0.8mm thick, has excellent wear resistance, while giving your cover a vivid, modern impact.

WOVEN

Innovative, 100% eco-friendly, woven textured fabric is completely allergenic and non-toxic and combines artisanal aesthetic trends with the most advanced yarns.

SUEDE

Extraordinarily soft microfibre material, produced with advanced textile techniques, gives it the distinct texture and enhanced colours. The polyester spun material is resistant to wear, very easy to clean and is water repellent.

SUEDE PAINT

Our Suede material is enhanced through thermal transfer printing, which allows us to reproduce large patterns while maintaining the distinct texture.

GLOSSY SILK

Beautiful glossy finished fabric, customised by sublimation of your image on the material in order to ensure the highest definition, chromatic performance and durability. This material features excellent stability thanks to the very low coefficient of liquid absorption, and is noticeably resistant to abrasion, elements and dirt.

MATTE SILK

Beautiful matte finished fabric, customised by sublimation of your image on the material in order to ensure the highest definition, chromatic performance and durability. This material features excellent stability thanks to the very low coefficient of liquid absorption, and is noticeably resistant to abrasion, elements and dirt.

COTTON FABRIC

Woven weave fabric In natural fibre 80% cotton and 20% linen, extremely resistant to wear and tear while pleasantly smooth to the touch. The contemporary style is further enhanced by the wide range of shades ranging from warm and natural tones to full and rich colours made deep by tenuous melange effects.

LINEN FABRIC

Natural, 70% linen and 30% cotton fabric with a compact texture. Selected after careful researches, it offers high resistance to wear combined with perfect adherence even on the round lines of the covers. Available in a wide colour palette of warm and natural tones.

TOUCH

High quality matte material available in 28 different colours. It is enriched with elegant Touch lamination making it easy on the eyes and velvety to the touch.

BRILLIANT LINEN

Highly resistant waxed fabric featuring a lustrous finish. The specific manufacturing process ensures an extremely smooth and easy to clean surface.

MATTE LINEN

Highly resistant waxed fabric featuring a matte finish. The specific manufacturing process ensures an extremely smooth and easy to clean surface.

RIBBON

Produced in fine shiny satin, the ribbon is elegantly finished with a swallowtail and is available in a wide range of colours that perfectly complete the tones of the book and box.
